Project partners are motivated to look for new ways to encourage students to take a more active role in their society, to be more confident in speaking up within communities (schools, countries, Europe) and to take initiatives. Teachers are going to use innovative teaching strategies and tools to prepare students as future active citizens and to encourage them.

Objectives

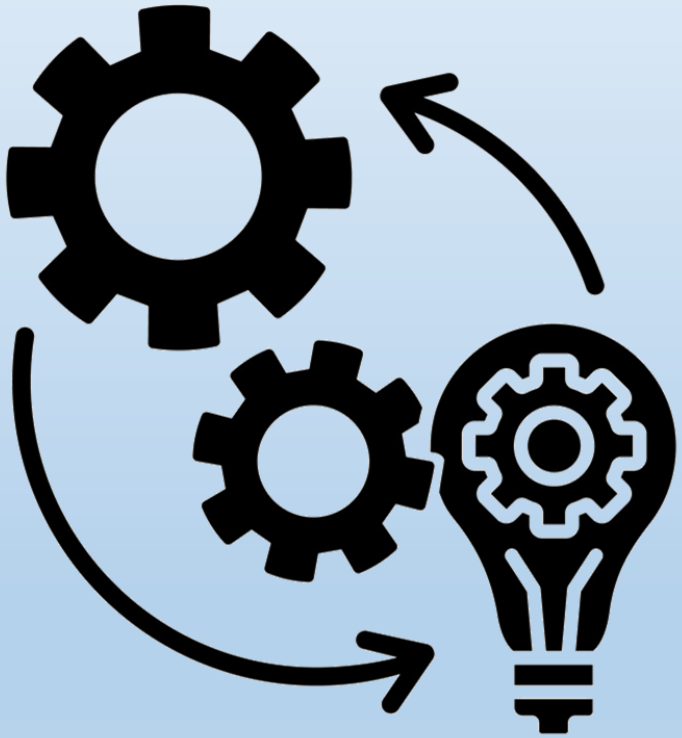

This project aims to enhance the qualification of teachers in order to foster CCE: participation and ESD of young people across Europe. It will work to prepare and encourage them to take an active role in their school and in local community empowering them to be active citizens in the future. It aims to enhance both the educational quality of teaching and the qualification of teachers. Inclusive strategies, gender parity and respect of the environment will be a transversal care in all steps.

Target groups

The target group of our project are the teachers, the teacher trainers, the inspectors and the headmasters of the secondary school education and their student, in the general school tracks. Teachers' initial training Institutions will be addressed. Indirectly educational Organizations in the non formal field, families and other stakeholders will be involved too. Partners consider the 2030 goals, focusing especially on 'Provide Quality Education', and 'Reduce Inequality' in network with the organizations active for this goals.

Implementation

Management, coordination and QA. We organize a webinar for training teachers (12 hours), and an European Pilot course for students (13 hours), exchanging expertise between the partner countries in order to check the effectiveness of the ECCOPS educational strategies and of the produced instruments for participation and sustainable development. The proiect will have a dedicated website, will organize 3 Consortium meetings (2 of them in presence), 2 Multiplier events, dissemination/exploitation.

We will produce the Toolkit (60 pages) including Guidelines for an innovative enacted curriculum, teaching learning tools for participation and sustainable development, and monitoring strategies, the Matrix of competences for the self assessment of the teachers, the Competence cards (in the national languages) for the students, to clarify the expecte outcomes and assess the learning steps. Inclusion, improved learning by the students and stronger European understanding will be reached too.
