Introducere

Scrisul este o activitate complexă, dificilă care implică atât efort intelectual cât și fizic în reproducerea semnelor grafice. Preșcolarii folosesc de la grupă mică instrumente de scris cu ajutorul cărora trasează diferite forme.

Necesitatea familiarizării copiilor preșcolari cu semnele grafice contribuie la exersarea și consolidarea diferitelor semne,linii și diverse combinații care îi vor ajuta să parcurgă o etapă importantă premergătoare inițierii viitorilor școlari în tainele scrisului.

Exercițiile propuse contribuie la formarea reprezentărilor de formă, mărime, direcție, vecinătate și la consolidarea motricității fine prin coordonarea motrică și coordonarea ochi-mână.
