37

La joacă, printre cuvinte!

Pentru școlarul mic, cititul și scrisul relevă noi posibilități de cunoaștere a lumii înconjurătoare, noi forme de comunicare între oameni și facilitează trecerea de la faza gândirii și comunicării situaționale la gândirea și comunicarea formală.

În perioada preabecedară elevii învaţă utilizarea abecedarului, citirea unei imagini, învaţă să converseze, să asculte, să înţeleagă ce li se cere. La sfârşitul acestei perioade, elevi sunt capabili:
- să asculte un mesaj, să răspundă corect la întrebări,
- să povestească întâmplări personale, evenimente,
- să alcătuiască propoziţii pe baza unui cuvânt de sprijin sau în legătură cu ilustraţiile, obiectele sau imaginile obiectelor cunoscute,
- să împartă propoziţia în cuvinte, cuvintele în silabe, silabele în sunete,
- să stabilească numărul şi ordinea silabelor în cuvintele analizate,
- să cunoască şi să stabilească locul pe care îl ocupă în cuvinte şi în silabe sunetele cu care au fost familiarizaţi,
- să formeze cuvinte noi din silabe date,
- să diferenţieze şi să compare cuvintele în funcţie de numărul de sunete.

Tot în această perioadă, elevii învaţă să scrie elementele grafice ale literelor, respectând forma, mărimea, proporţia între elemente şi distanţa dintre ele

În perioada abecedară, elevii învaţă să compună cuvinte la alfabetar, să pronunţe corect cuvinte, să citească texte simple, să respecte intonaţia impusă de semnele de punctuaţie, să recite poezii.

Etapa abecedară înseamnă învăţarea citirii şi scrierii tuturor literelor alfabetului, a unor cuvinte şi chiar a propoziţiilor scurte. Elevii vor efectua exerciţii de scriere a tuturor literelor, vor copia cuvinte şi propoziţii, vor transcrie scurte texte.

Pentru a deveni deprindere, cititul trebuie să devină o activitate intelectuală conştientă şi automatizată. Unirea literelor în silabe şi realizarea câmpului de citire de o silabă reprezintă o componentă importantă a deprinderii cititului. Trecerea pragului de la silabe la cuvânt e destul de dificilă pentru elevi, stabilirea locului fiecărui cuvânt în propoziţie sau frază, precum şi înţelegerea sensului acestora este o activitate deosebit de complexă, dar o componentă foarte importantă a actului citirii.

Deprinderea scrierii este un proces complex, mult mai dificil decât cel al citirii. Dificultatea constă în faptul că scrisul nu se reduce la recunoaşterea fonemelor şi a grafemelor, ci realizează sintetizarea combinaţiilor complexe ale semnelor grafice şi reproducerea lor corectă şi estetică.

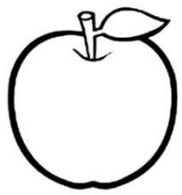

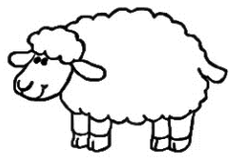

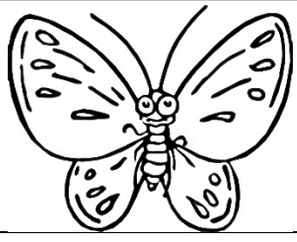

Având în vedere cele menționate mai sus, pentru a exersa deprinderea citit-scrisului, vă propunem o varietate de exerciții pentru învățarea citit-scrisului într-o manieră plăcută pentru copii. În acest caiet sunt prezentate exerciții de identificare a literei inițiale, de corespondență a cuvântului/propoziției cu imaginea dată, de formare și scriere a cuvintelor din silabele și literele date, de completare a cuvintelor lacunare. Partea cea mai plăcută este că pentru rezolvarea cerințelor, pe lângă scris și citit, elevii trebuie să coloreze, să decupeze și să lipească. În acest mod, prin intermediul acestor activități plastice, sarcinile vor deveni mai distractive și mai ușor de îndeplinit.

Astfel, elevii vor învăța, prin joc, să lucreze cu litere și silabe pentru a forma un cuvânt prin colorarea, decuparea și lipirea literelor/silabelor care-l formează. Vor învăța să citească o imagine și să-i asocieze cuvântul/propoziția corespunzătoare. Vor identifica silaba cu care începe cuvântul prin colorarea acesteia, vor identifica și colora imaginea corespunzătoare cuvântului care începe cu litera dată.

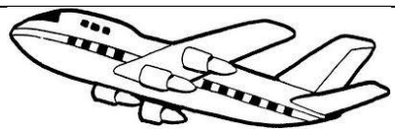

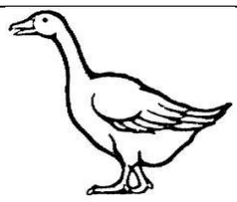

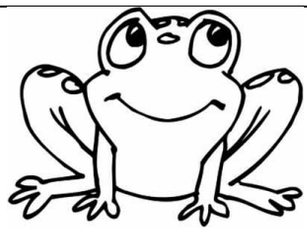

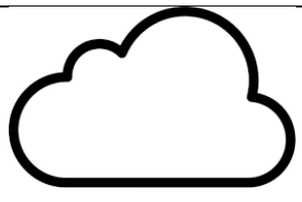

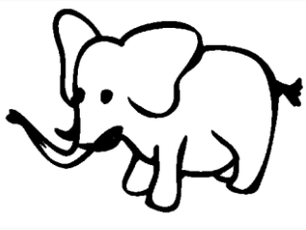

Prin utilizarea acestui caiet de exerciții pentru învățarea citit-scrisului sperăm ca activitățile de citit-scris să se desfășoare într-un mod plăcut, relaxat și relaxant atât pentru copii cât și pentru îndrumătorii acestora, fie ei profesori sau părinți.
